

Build this weekend. Win a paid tech internship.

Build this weekend. Win a paid tech internship.

The Challenge

Given high-resolution satellite imagery of a forest/kml files, build a working tool that can:

- Detect and count individual tree crowns
- Estimate the canopy area they cover
- Present the results in a way that another person can actually use

You may use **any tech stack, AI/ML model, or AI coding tool** you want. Vibe coding is welcome.

Solo entries only.

We care about whether it works, whether a stranger can use it without you, and whether you're honest about its limitations. In carbon markets, a rough tool that admits what it can't do is more valuable than a polished one that invents numbers.

Deadline: Monday, 14 September, 11:59 PM IST

Submit a live demo link and a maximum 2-page explanation of how your solution works.

Shortlisted builders will be invited to demo their work at our Kolkata office. That demo is the interview.

Full name *

Your answer

Email address *

Your answer

Phone / WhatsApp number *

Your answer

LinkedIn profile *

Your answer

Where are you currently based? *

Your answer

Are you available to work from our Kolkata office? *

Yes

No

I can relocate to Kolkata

Live demo URL *

Your answer

Repository URL *

Your answer

Your 2-page explanation

*

Upload a maximum 2-page PDF explaining:
your approach architecture / workflow key technical decisions what worked what
didn't known limitations

Honesty about limitations is part of the evaluation.

Upload 1 supported file. Max 10 MB.

 [Add file](#)

What did you build?

*

In 3–5 sentences, tell us what your solution does and what you chose to
prioritize.

Your answer

What doesn't work?

*

Tell us honestly about the limitations, failure cases, or shortcuts in your
submission.

Your answer

What technologies did you use?

*

Languages, frameworks, models, APIs, databases, AI coding tools, etc.

Your answer

Did you use AI coding tools? *

☐ Yes

☐ No

If yes, which ones? *

Your answer

Are you available for an in-person demo in Kolkata if shortlisted? *

☒ Yes

☐ No

Anything else you'd like us to know? *

Your answer

Submission confirmation *

☐

I confirm that this is my own solo submission and that the demo link and repository above are accessible to the review team.

A copy of your responses will be emailed to kanhaiyak0104@gmail.com.
